

# Quarterly Financial Results for the Nine-month Period Ended December 31, 2020

#### **Hirata** Corporation

# I. Financial Results and Outlook

The nine-month period ended December 31, 2020 (April 1, 2020 - December 31, 2020)

#### **Overview**

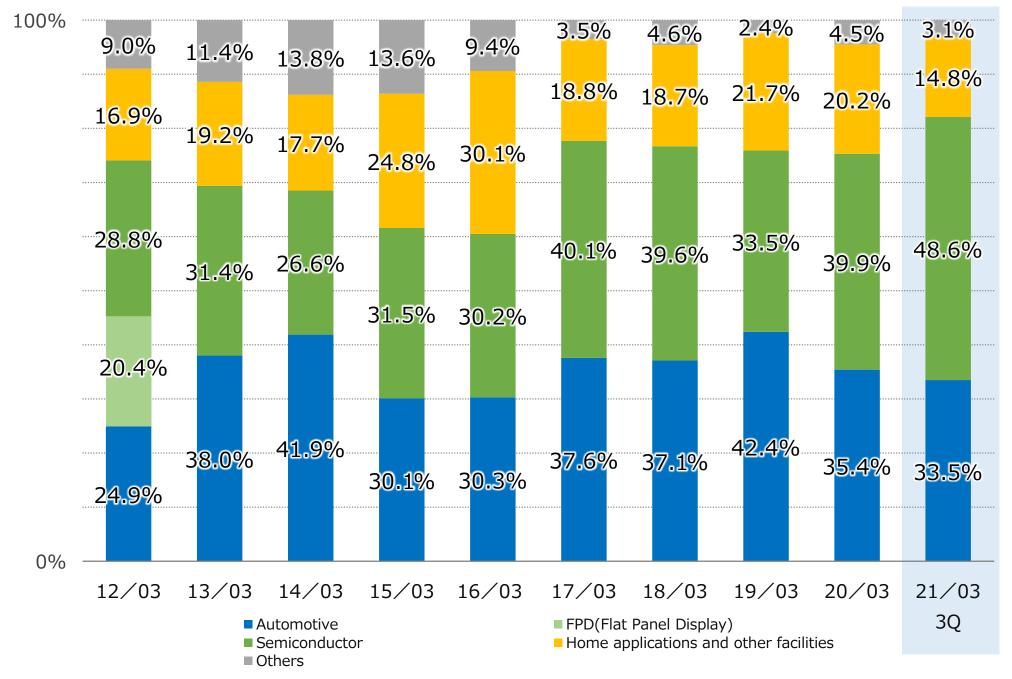

Demand for data centers has increased against the backdrop of the full-scale operation of 5<sup>th</sup> generation mobile communication systems and the expansion of work from home. As a result, semiconductor device manufacturers continue to make capital investments. OLED related business was steady and the sales of next-generation car production equipment such as electric vehicle increased as well. In consequence, the sales and profit increased.

#### -As to the amendment of the full-year forecast

As to the earnings forecast ending March 2021, the sales of automotive related business would be lower than anticipated due to a change of plan on our scheduled project even though electric vehicle business turned upward. As a result, the total sales turned out to be lower than the figures we announced in November 2020. Regarding the profits, on the other hand, we revised up the operating income, ordinary income, and net income attributable to owners of the parent company because the profits would be boosted by the company-wide effort of reducing the cost rate and SG&A expenses.

#### Automotive related business

We foresee that both automotive and parts manufacturers maintain a cautions stance on their business investment even though it is reported that people become more interested in driving their own cars rather than using public transportations under the spread of the COVID-19 situation. We are not sure when our ordering situation would be back to normal, but we put all our energy into receiving orders of business inquiries such as EV related business.

#### Semiconductor related business

The full-scale service of 5G, and work from home and online lesson are expanding globally. This situation put upward pressure on investment for CPU of data center and automated driving related parts for semiconductor equipment investment. We work harder to receive orders continuously on its semiconductor business and focus on receiving orders of organic EL related business which has been very firm.

#### Home appliances and other business

We expect that companies tend to shrink their capital investment and the unclear situation continues caused by the limitation of their production activities under lockdown by local government in Asia due to the spread of the COVID-19. We try harder to receive large orders for home appliances business.

### Dividends and dividend ratio per share

Note: Dividend ratio is on a consolidated basis.

# About dividend forecast

We fully consider profit return to our shareholders as a highest priority issue. So, we endeavor to pay dividend stably and continually to be more than 20% of the consolidated dividend ratio as a guide by strengthening our financial characteristic and also taking into consideration our consolidated performance and business deployment.

As to the next dividend, Hirata revised it up to 65.00 yen on the basis of the dividend policy, taking the profit level of the sales estimate and the dividend ratio of the previous year into consideration.
