Announcement of Receipt of Purchase Orders for Production Equipment Related to Automotive Components

Hirata Corporation is pleased to announce that we have been awarded purchase orders for production equipment related to automotive components as below.

I. Business Overview and the Background of Orders

- Hirata is expanding its business worldwide to manufacture and sell a wide variety of production equipment for various industrial fields such as automobile and semiconductor.
- In the automotive sector, our technological capabilities, production capacity and proven track record enable us to support a wide range of vehicle types. These strengths have earned us continued recognition from customers both in Japan and overseas.
- This order involves assembly equipment for in-vehicle electronic components, placed by an automotive components manufacturer. We believe this reflects a high evaluation of our engineering capabilities and overall expertise.

II. Overview of the Order

1. Ordered Equipment: Assembly equipment for in-vehicle electronic components
2. Order Amount: More than 6 billion yen
3. Customer: The customer name will not be disclosed due to confidentiality obligations. There are no capital or personnel relationships to disclose between the customer and our company, and this transaction does not involve any related parties.
4. Destination: North America, South-east Asia

III. Impact to Business Performance

The revenue from the ordered equipment will be recognized progressively in accordance with the progress of construction. The sales from this order will contribute to our performance in the current and subsequent fiscal years.
